

Dear Neighbor,

We are writing seeking information about the motorized recreation route on or adjacent to your property. We are collecting data about conditions along the route and are interested in hearing about your experience with the route and its users.

We are involved with an organization called Minnesotans for Responsible Recreation, whose mission is to protect peace and quiet, fresh air, personal safety and healthy trails and waterways in Minnesota. Our data collection is part of a larger effort to make sure that public funds are not being used to foist unwanted trails on property owners or neighborhoods. Many property owners don't realize that they have control over motorized trails on their land. We want public funds to be used to solve problems caused by motorized recreation.

Please call on us at _____ if you would like to share information about the motorized recreation route on or adjacent to your property.

Sincerely,
